

**05-1981** [A-1376] Applied Concepts - **Monitor Edition** (blind man's chess module)  
**Monitor Edition** verscheen zo rond mei 1981 op de (Duitse) markt. Een spel waarbij twee spelers blind tegen elkaar kunnen schaken. Lijkt mij een goed spel om je geheugen te trainen! Dit moduul is natuurlijk uitwisselbaar met de **Multi Game System (MGS)**, de eerste spel-computer van Applied Concepts, of de licht verbeterde **Great Game Machine (= MGS III)**.

## **Monitor Edition** **Master Kriegspiel Cartridge**

One of the greatest drawbacks devotees of **Kriegspiel** (Blind Man's Chess) have always had was finding a third party to referee their game. **Kriegspiel** is the game of chess where two players cannot see the other's chessboard, and the game always required the third party to inform them if their moves were legal, if a capture was made, etc.

That is – until now! **Monitor** is the **Kriegspiel** referee. Now, two players can enjoy their blind chess and **Monitor** will carefully guard the two opponent's data, while providing all the legal responses to both black and white moves. **Kriegspiel** can be an exciting, challenging game and with **Monitor** easy and convenient!

APPLIED CONCEPTS PRESENTS . . .

PRELIMINARY

### Monitor Edition (KC-1)

Master Kriegspiel Cartridge

One of the greatest drawbacks devotees of Kriegspiel (Blind Man's Chess) have always had was finding a third party to referee their game. Kriegspiel is the game of chess where two players cannot see the other's chessboard, and the game always required the third party to inform them if their moves were legal, if a capture was made, etc.

That is— until now! **Monitor** is the Kriegspiel referee. Now, two players can enjoy their blind chess and **Monitor** will carefully guard the two opponent's data, while providing all the legal responses to both black and white moves.

**Kriegspiel** can be an exciting, challenging game -and with **Monitor** -easy and convenient!

**FEATURES:**

- Tells when and where a capture occurs.
- Tells when and the direction of all checks.
- Stores entire game for later re-play.
- Tells material left on board.
- Tells if there are any pawn captures.
- Memory Function for Continuing Play at a later time.
- Feedback/Move Indicator  
On-going communication with Game Computer, but so designed as not to reveal your opponent's move.
- Exclusive Rank Display  
Easy verification of chessboard, of your men only.
- Audio ON/OFF  
**Monitor** can be silent, if you choose.
- Password Option.  
Entry to the computer can be secured with the use of a password.

## OTHER CHESS CARTRIDGES

### MASTER CHESS TRIO

The most innovative chess concept since the beginning of this noble game. This three-cartridge format affords the serious chess player all the intricate techniques of a complete chess game. The opening book cartridge concentrates on the many opening strategies used by the Masters; the mid-game cartridge fortifies the position while the endgame cartridge provides the finesse and skill of this colorful and exciting portion of chess. Exciting new chess cartridges compatible with MEGA 4 are under development by Destiny Products.

### GRUENFELD EDITION Master Chess Opening Cartridge

For serious players, the Gruenfeld Edition contains over 7,000 opening moves in its library, using and recognizing all classical moves. Gruenfeld even allows a player to control the opening line of play if desired by asking Gruenfeld to select

alternative moves from its opening library. A more powerful electronic opening opponent simply does not exist in dedicated chess computers.

### MORPHY EDITION Master Chess Cartridge

The Morphy Edition has long been the world standard of high quality chess programming. It remains in the Destiny Line not only for its excellence of play but as an economical alternative to its successor Steinitz-4. Morphy offers nine selectable levels of play, with strong emphasis on the mid-game. Morphy is perfect for the beginner as well as challenging to any chess master. Morphy still enhances the Master Chess Trio with its stimulating mid-game play.

### CAPABLANCA EDITION Master Chess Endgame Cartridge

The Capablanca Edition is the only endgame strategy cartridge on the market. Capablanca has ten levels of play. Level 0 is specifically designed for

solving complex endgame problems. At this level, Capablanca can solve any problem through mate-in-eleven and many other problems that even the greatest chess masters have difficulty with. Level 9 allows the deepest possible search for the postal chess player. But, like Morphy, this program allows for the less seasoned competitor, so that any player can improve game skills while enjoying competitive chess at his own level.

### MONITOR EDITION Master Kriegspiel Cartridge

The Monitor Edition fills a need long felt by players of Kriegspiel or Blind Man's Chess. Monitor takes the place of the referee, telling the players whether or not moves are legal, when and where pieces are captured, check and mate, and pieces left on the board. The players communicate with The Great Game Machine throughout the game, but receive only information about their own moves — never their opponent's. With the Monitor Edition, Kriegspiel lovers finally have an ever-ready fair and impartial referee.

**Gruenfeld Edition—GOB-1**  
Game cartridge, keyboard overlay,  
operation manual.

**Morphy Edition—MM-1**  
Game cartridge, magnetic chessmen,  
keyboard overlay, operation manual.
