

### **07-1984** [E-1951] Fidelity - **Theoretical Chess Endings** (module)

Fidelity model TCE. Na een lange aankondiging is dit moduul nooit verschenen! Over het waarom, heb ik verder geen enkele informatie. Ik kan alleen maar gissen naar de oorzaak. Persoonlijk denk ik dat het commercieel gezien, niet haalbaar was om dergelijke modules op de markt te brengen, en dat daarom uiteindelijk besloten werd om dit project te stoppen.

#### **Module Theoretical Chess Endings (model TCE)**

- Sensory Chess Challenger 9 (A/B)
- Prestige Challenger (I/II)
- Elite 5.0, Elite A/S (A/B/C)
- Playmatic S
- Elegance
- ?
- Sensory Chess Challenger 12
- Elite Avant Garde (#2 ~ #11)

## **Fidelity announcement (end of 1983) Rook and Pawn Endings (model TCE)**

Crammed with knowledge of common endings, this cartridge will make your Chess Challenger Prestige or Sensory "9" shine in that crucial phase of the game. This cartridge incorporates guidelines for evaluation and play of frequently encountered theoretical positions such as basic checkmates, pawnless endings, King and pawn endings, Rook and pawn endings, and Queen vs. pawn on the seventh rank endings. Correct evaluation of theoretical endings is a powerful weapon when joined with a full-width search.

Also, the cartridge can serve as an endgame-teaching auxiliary for the novice and the intermediate player. Enhancing this function (included in the package) is the booklet "Key Theoretical Endings" by U.S. Chess Federation Life Master **Boris Baczynskyj**.

### **Modul TCE**

Endspielmodul mit breitem Wissen. Enthalten sind: König-Bauern Endspiel. Turm-Bauern Endspiel. Dame gegen Bauer auf der 7. Reihe etc. Außerdem eignet sich das Modul hervorragend für das Endspiel-Training.

**Module Theoretical Chess Endings (model TCE)  
never released! - nie veröffentlicht!**
