

### **09-1998 [B-0526] Excalibur - King Arthur Deluxe**

Van de 'King Arthur' zijn er minstens twee verschillende modellen geproduceerd en dit is volgens mijn persoonlijke mening de fraaiste uitvoering. Een kunststof model met een 'houtlook'. Na 10 jaar is deze luxe versie in de U.S.A. nog steeds te koop, en dat is eigenlijk vrij uitzonderlijk te noemen. Jammer dat de firma Niggemann dit model niet in zijn assortiment heeft opgenomen. Over de exacte speelsterkte tast ik in het duister, maar een speelsterkte van meer dan 1500 Elo-rating zou mij verbazen. Nergens zijn er technische gegevens te vinden, want daar zwijgt Excalibur vaak over en dat is eigenlijk nergens voor nodig.

#### **Description**

- Model number: 915W
- Magnetic sensory chessboard and pieces
- Large 7-digit LCD display
- LCD screen has adjustable contrast for easier viewing
- Displays position score evaluation at all times to a tenth of a pawn
- Tournament strength -1750 USCF-rating with speed and action chess levels
