**05-1981** [A-1376] Applied Concepts - **Monitor Edition** (blind man's chess module) **Monitor Edition** verscheen zo rond mei 1981 op de (Duitse) markt. Een spel waarbij twee spelers blind tegen elkaar kunnen schaken. Lijkt mij een goed spel om je geheugen te trainen! Dit moduul is natuurlijk uitwisselbaar met de **Multi Game System** (**MGS**), de eerste spelcomputer van Applied Concepts, of de licht verbeterde **Great Game Machine** (= **MGS III**).

## Monitor Edition Master Kriegspiel Cartridge

One of the greatest drawbacks devotees of **Kriegspiel** (Blind Man's Chess) have always had was finding a third party to referee their game. **Kriegspiel** is the game of chess where two players cannot see the other's chessboard, and the game always required the third party to inform them if their moves were legal, if a capture was made, etc.

That is – until now! **Monitor** is the **Kriegspiel** referee. Now, two players can enjoy their blind chess and **Monitor** will carefully guard the two opponent's data, while providing all the legal responses to both black and white moves. **Kriegspiel** can be an exciting, challenging game and with **Monitor** easy and convenient!

One of the greatest drawbacks devotees of Kriegspiel (Blind Man's Chess) have always had wa finding a third party to referee their game. Kriegspiel is the game of chess where two player cannot see the other's chessboard, and the game always required the third party to inform them their moves were legal, if a capture was made, etc. That is—until now! <b>Monitor</b> is the Kriegspiel referee. # Applied Concepts Monitor Edition Master Kriegspiel Cartridge

This eBay (US) auction is for the **Applied Concepts Monitor Edition Master Kriegspiel** cartridge for the **Great Game Machine** by **Applied Concepts** or **Modular Game System** by **Chafitz**. Its from their Master Series of Machine Intelligence Games. It includes the Operation Manual, the Product Analysis and Warranty Registration card, the keypad overlay and the cartridge as pictured.

# THE GAME OF KRIEGSPIEL The History of Kriegspiel

This modern day chess variant was invented by a Fleet Street journalist, **Michael Taylor** (1865-1929). Through the years attempts have been made to change the name to Commando Chess and Screen Chess, but the original name has persisted. Kriegspiel it was; and Kriegspiel it remains.

The rules of Kriegspiel have never been codified although local tournaments have been held from time to time. The version here is believed to be that most commonly in use. It conforms closely to that used by the Kriegspiel circle of the old Gambit Rooms, now demolished, in the City of London, whose expertise was second to none.

# **The Game**

Kriegspiel is a chess variant for three: two players and an umpire. Each has his or her own chess board and pieces. The players are situated so that they may see only their own chess board. The umpire may observe all three boards.

The players take turns, each moving one piece per turn, with the goal of capturing the enemy king. Only one piece can occupy a square at a time, and an enemy piece may be captured by occupying its square and removing it from the game.

Each player's move is known only to that player and to the umpire. The other player does not know his opponent's move, although some limited intelligence is available. The umpire copies both player's to his board. Thus, the game position at any moment is correct only on the umpire's board.

Monitor Edition

master kreigspiel

Kriegspiel is the game of SEEK AND DESTROY Chess where two players cannot see the other's chessboard!

This game of confrontation has always required a third party to referee and report if moves were legal, if a capture was made, or any other startling event. **THAT IS — UNTIL NOW!** 

MONITOR is the perfect Kriegspiel arbitrator. Now two players can enjoy this game of cunning and skill while Monitor carefully guards the two adversaries' data, and at the same time provides all the legal responses to both black and white moves.

## **MASTER SERIES**

Applied Concepts, Inc. has long had a commitment to continue updating the level of play of its artificial intelligent games. This commitment has never been more evident than in this Master Series. Our programmers have researched the great masters of chess, checkers, reversi, kriegspiel and blackjack, and incorporated into our new games the techniques and strategies employed by these Masters.

## FEATURES

- Capture Report MONITOR will report to your opponent when a capture is made and at what position on the board.
- Checks Report MONITOR will report all checks, and the direction of all checks.
- Instant Replay As soon as a checkmate, or one opponent resigns, MONITOR will immediately display each move made in the game, from start to finish.

Applied Concepts Monitor Edition Master Kriegspiel cartridge (Photos are taken from the packaging) (Source: Applied Concepts Inc. – 1981) (photo copyright © by <u>http://www.schaakcomputers.nl/</u>)

**Count Report** — At any time, either opponent may inquire into how many pieces — white and black — are left on the board. **MONITOR** will respond with the count.

Pawn Captures - MONITOR will report any pawn captures.

Pawn Promotion — MONITOR will report pawn promotions.

**Password Option** — Entry to the game computer can be secured with the use of a password.

**Pawn Capture Rule Option** — Opponents may decide at outset of game if they "must" capture a pawn when inquiring if there are any pawn captures available to them.

Audio Option — MONITOR can play silently, or with different tones accompanying entries and messages.

Feedback/Move Indicator — On-going communication with game computer, but so designed as not to reveal your opponent's move.

Exclusive Rank Display — Easy Verification of chessboard, of your men only.

Battery Operated Portable Use — Optional rechargeable battery pack provides up to 6 hours of continuous play on full charge.

**Position Storage Memory** — A game may be interrupted in either A/C or battery operation and this storage memory function will hold all pieces in proper board position for game resumption at a later time. Storage times: A/C mode, indefinite; Battery mode, 24 hours.

# **OTHER CHESS CARTRIDGES**

### MASTER CHESS TRIO

The most innovative chess concept since the beginning of this noble game. This three-cartridge format affords the serious chess player all the intricate techniques of a complete chess game. The opening book cartridge concentrates on the many opening strategies used by the Masters; the mid-game cartridge fortifies the position while the endgame cartridge provides the finesse and skill of this colorful and exciting portion of chess. Exciting new chess cartridges compatible with MEGA 4 are under development by Destiny Products.

#### GRUENFELD EDITION Master Chess Opening Cartridge

For serious players, the Gruenfeld Edition contains over 7,000 opening moves in its library, using and recognizing all classical moves. Gruenfeld even allows a player to control the opening line of play if desired by asking Gruenfeld to select alternative moves from its opening library. A more powerful electronic opening opponent simply does not exist in dedicated chess computers.

#### MORPHY EDITION Master Chess Cartridge

The Morphy Edition has long been the world standard of high quality chess programming. It remains in the Destiny Line not only for its excellence of play but as an economical alternative to its successor Steinitz-4. Morphy offers nine selectable levels of play, with strong emphasis on the mid-game. Morphy is perfect for the beginner as well as challenging to any chess master. Morphy still enhances the Master Chess Trio with its stimulating mid-game play.

### CAPABLANCA EDITION Master Chess Endgame Cartridge

The Capablanca Edition is the only endgame strategy cartridge on the market. Capablanca has ten levels of play. Level 0 is specifically designed for solving complex endgame problems. At this level, Capablanca can solve any problem through mate-in-eleven and many other problems that even the greatest chess masters have difficulty with. Level 9 allows the deepest possible search for the postal chess player. But, like Morphy, this program allows for the less seasoned competitor, so that any player can improve game skills while enjoying competitive chess at his own level.

#### MONITOR EDITION Master Kriegspiel Cartridge

The Monitor Edition fills a need long felt by players of Kriegspiel or Blind Man's Chess. Monitor takes the place of the referee, telling the players whether or not moves are legal, when and where pieces are captured, check and mate, and pieces left on the board. The players communicate with The Great Game Machine throughout the game, but receive only information about their own moves — never their opponent's. With the Monitor Edition, Kriegspiel lovers finally have an everready fair and impartial referee.

Gruenfeld Edition—GOB-1 Game cartridge, keyboard overlay, operation manual. Morphy Edition—MM-1 Game cartridge, magnetic chessmen, keyboard overlay, operation manual. Capablanca Edition—CEG-1 Game cartridge, keyboard overlay, operation manual. Monitor Edition—KC-1 Game cartridge, keyboard overlay, operation manual.
