

11-1980 [A-1654] Fidelity - **Voice Sensory Chess Challenger** with wooden back panel

On February 6, 2004, a rare model of the Fidelity Voice Sensory Chess Challenger was offered on eBay. It has a beautiful wooden case with a wooden back panel! It came with the user manual and power supply, as well as the wooden chess pieces as pictured. According to the seller, the chess computer was in excellent working condition. The buyer was a major German collector from Münster (Germany) who has since sold his entire collection. This exceptional model was sold for 273 US dollars.

In my opinion, it is an original and exclusive edition from Fidelity Electronics, and I have not seen any other similar to it.
