ACCOLADE

With a certified U.S. Chess Federation rating of 2065, this game challenges even the most advanced players with its uncompromising strategy. On the other hand, the Accolade has a hint feature that prompts those who have never played the game before. Other features include an opening book of more than 3,000 positions, 2 sets of chess pieces and a LCD chess clock.

COMET

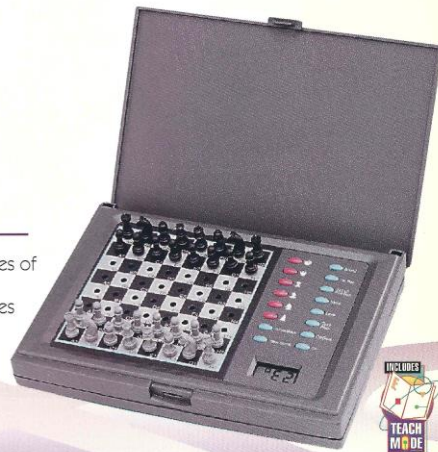

Strongest portable chess game. The Comet combines great looks and ease of portability. But don't let its small size fool you. This portable chess computer has 100 levels of difficulty, which includes tournament, blitz & beginner levels, challenging the finest chess players. Other exciting features include thousands of opening book moves, storage compartment, snap-on dust cover, chess clock and a large LCD display for important information. This set also comes with a hint mode for those who haven't quite reached their full potential.

CUTLASS

A compact unit designed for easy portability, yet packs features of other larger, more sophisticated chess sets. With 72 levels of difficulty built into it, the Cutlass will provide memorable games for beginners and advanced players. Other features include a snap-on dust cover, specially designed pieces, battery operation, special teaching function and long term memory.

STILETTO II DELUXE

A beautiful addition to anyone's collection. This elegant looking wood-grained chess set is a handsome yet powerful game.

Aside from the natural looking wood surface, the Stiletto II Deluxe has an estimated rating of 1650, 72 levels of play, Excalibur's Teaching Mode, memory save, and position verification. Not only will the Stiletto II Deluxe be a handsome show-piece in any home, but it's also a challenge to play.

STILETTO II

The perfect game for everyone.

With a special teach-mode specially built in, anybody can become an experienced player in no time. The Stiletto II also

offers 72 levels of challenging play for beginners to advanced players. Some features include long term memory, 8 bit microprocessor, estimated rating of 1600, over 250 book openings, chess clock, position verification, memory save, take-back move and position set-up.

The Advanced Teach Mode teaches beginners in a simple, methodical way the fundamentals of chess, ranging from individual-piece moves to game strategies.

LEGEND II

A full-sized elegant chess set designed for the entire family. With 100 levels of difficulty, the Legend II can play competitive chess for the beginner as well as the seasoned player. Some great features include a user selectable playing style, large opening book, and chess clock. And for the beginners, the legend II can give hints upon request.

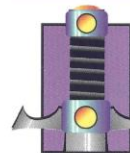

WIZARD

This is your passport to travel. With an estimated rating of 1600, the Wizard is one chess set to reckon with. And with its 64 challenging levels of chess play, from beginner to advanced, there's a level that's perfect for every member of the family. Other features include 2 sets of chess pieces, take-back moves, threat warning and position set-up.

SABRE II

Designed with easy to read buttons, LCD display and teach mode, the Sabre II will provide challenging moments at any level. And when skill levels improve, the higher levels of the Sabre II will prove quite challenging. Other features include position set-up, solves mate-in-2 problems and take-back moves.

GENERATION of TECHNOLOGY

What is a Chess Computer?

A chess computer is a traditional board with real chess pieces and electronic circuits which respond to the position of the pieces on the board.

An important benefit is that you can play a game against the computer when a human opponent is not available. You can do this at any time, and even switch off and start again later, because the computer will remember exactly the position in the game even when switched off.

If you're a beginner, Excalibur's advanced Teach Mode will help you learn about the game, its pieces and how they move.

Finally, don't think you have no chance against the computer. All Excalibur computerized chess sets have many levels of difficulty. Even our most advanced model will give the absolute beginner a good chance of a win on the lower levels. As you improve and want a more challenging game, you simply increase the level of difficulty.

What is our Advanced Teach Mode?

The Advanced Teach Mode teaches beginners in a simple, methodical way the fundamentals of chess, ranging from individual-piece moves to game strategies.

New players can choose from five easy-to-follow Teach Modes. In the first mode for example, the user competes against the computer where only pawns and kings are used. Once the player has understood the level, the player goes on to the next levels where more chess pieces are utilized. The five training modes are as follows:

Mode 1: Uses kings and pawns.

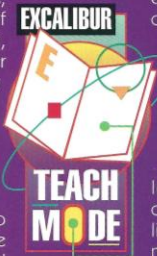

Mode 2: Uses kings, queens and pawns.

Mode 3: Uses kings, rooks and pawns.

Mode 4: Uses kings, bishops and pawns.

Mode 5: Uses kings, knights, and pawns.

This simple teaching method has proven to be the most effective teaching method, and it's now available in Excalibur chess sets.

The Tradition Continues

When Sid Samole watched Mr. Spock play a game of chess against the computer in a Star Trek episode in 1976, he became fascinated with the notion of playing chess against an electronic opponent whose sole purpose was to make chess moves. With this concept in mind, Sid Samole brought the first electronic chess game to market, and, in a short time, created an organization dedicated to the development of world champion computer chess games delivering over 4 million games worldwide.

Nearly 20 years later, the tradition continues.

Shane Samole, son of Sid Samole, has continued this philosophy by opening his own company Excalibur Electronics offering its own line of superior electronic chess games. Using some of the latest technology and state-of-the-art equipment, Excalibur is proud to introduce a line of electronic chess games targeted for every generation. From its unique teach-mode for beginners, to the Grand Master level for those with experience, each Excalibur chess game is multi-leveled for every member of the family to enjoy.
