## The Minds Of Tomorrow

Chess playing has been considered as one of the most challenging games in the world. It's a universal board game that's shared among people all over regardless of race, gender, or culture. Being victorious in this game reflects a mind of high intelligence and superior initiatives.

In light of chess playing's ability to shape future minds, schools all across the United States view chess as a powerful educational tool. Thousands of pre-teens and teens understand that chess coheres the mind to anticipate, make decisions, and react in a way no other game can. It creates and reinforces the foundation of positive thinking and provides hours of fun during the process.

At Fidelity Electronics, we have been focusing on this massive group of chess players by helping to organize and sponsor chess tournaments from coast to coast. And supported by "School Mates," a magazine sponsored by Fidelity and published every two months, chess players between the ages of 10-16 have access to information regarding tournament sites and results, strategic chess maneuvers and in-depth editorials.

## The Untapped Market

The role of chess playing has recently been perceived as an educational tool rather than a recreational one. Because of this attitude shift, the chess playing population has become a source of untapped potential. This is evident by the extensive number of chess tournaments and other related school activities that take place around the country. Its growth is expected to increase tremendously with the introduction of more sophisticated and computerized chess games, and with the current movement toward technologically advanced items, the chess playing community is primed and ready to exploit the availability of such high-tech games.

## Step Into The Future

The trend towards state-of-the-art technology has created some of the most challenging computerized games ever. Introducing Fidelity Electronics' line of futuristic board and other mind-teasing challenges, all designed by experts and crafted with superb care.

Just imagine playing a game of chess where pieces move mysteriously from square to square, or a board that provides helpful hints by talking to its opponent; it's the next best thing to actually competing against an expert. Moreover, Fidelity Electronics' wide range of chess games will guarantee hours of fun for everybody.

In addition to the variety of chess sets available, Fidelity Electronics also has games that will push intensity levels to the limit. Games such as backgammon and bridge require 100% concentration and tactful planning. Or if it's pulse-racing action that is most sought after, then the popular Hit Klack will be the perfect solution; they're games that require total hand and eye coordination - plus nerves of steel!

With the expanding growth of electronic games anticipated well into the 21st century, Fidelity Electronics is constantly researching and monitoring the changes in this area. Thus, creating new features for chess playing and greater challenges for other mind-teasing games. Best of all, each and every product are designed by experts with a strong dedication toward quality and durability. As a result, every Fidelity Electronics product provides endless hours of fun and an educational experience unlike any other.

# Promotions

Fidelity Electronics is proud to play an active role in sponsoring major chess tournaments throughout the year. These tournaments attract chess players from junior and senior high schools all across the United States with participation figures well into the thousands. And with an aggressive marketing program, which includes prize give-aways and certificates, Fidelity Electronics has gained immense name recognition among the chess-playing population. Moreover, its ingenuity in creating new features have made Fidelity Electronics *the* popular choice for computerized chess games.

## PROUD SPONSORS OF:

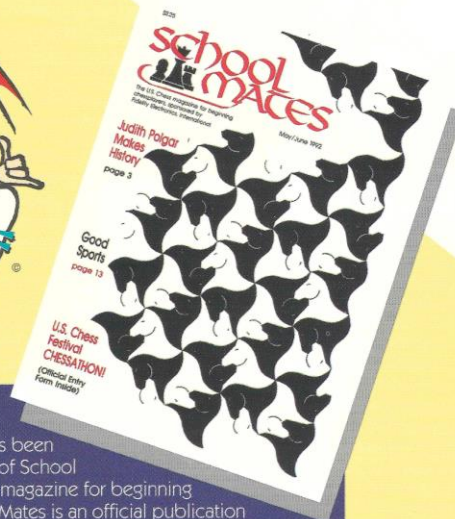

▶ First U.S. Chess Festival.  
July 1992.

▶ First Chessathon. July  
1992.

▶ The second Chessathon.

## EL DORADO II (MODEL 6142)

This unit was designed for the chess player who plays the game occasionally but demands the look of elegance and sophistication. With its black hi-tech look and state-of-the-art features, the El Dorado II will not only emphasize the beauty of chess but also provide eight different levels of competitive play. Other features include sensory playing surface, a library of 100 book openings and a memory save feature. Stronger and more handsome than its predecessor, the El Dorado II will open the world of chess to you.

5

## CHESSMATE (MODEL 6136)

Fidelity offers you your only "true" chess mate. It can travel anywhere and offer you a game of chess 24 hours a day. The Chess Mate features an ultra thin design, which makes it so portable that it easily fits into your briefcase, backpack or purse. It has 8 selectable skill levels, a liquid crystal display, a sensory playing surface and memory save. Once you pick up a Chess Mate, you won't want to put it down.

## AVANTI (MODEL 6137)

The Avanti is our latest achievement in portable technology and styling. A full sized chess board, which offers playability in a truly compact game. This newly designed unit has an area at the top to accommodate your chess pieces. You no longer have to worry about losing your pieces during or after a game. With 8 levels of play, a magnetic playing surface and pieces, memory save and a sensory playing surface, the Avanti will provide you with hours of entertainment wherever you are. Thanks to Avanti you've got it all together.

## CHALLENGER SERIES.

This series of computerized board games, which includes chess and bridge, is for the serious player who wants a challenging opponent and that little extra something - like futuristic characteristics - where pieces move by themselves or boards that prompt helpful hints or playful remarks.

6

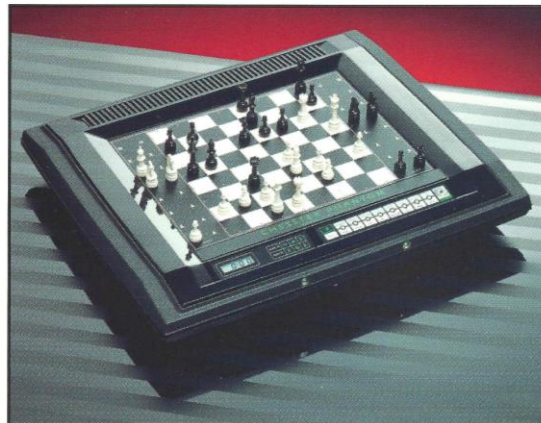

### PHANTOM CHALLENGER®

(MODEL 6100B)

A unique and somewhat mysterious chess game that thinks and moves chess pieces by itself. It's a one-of-a-kind challenge, specially designed to provide hours of unprecedented enjoyment for chess players at any level. The technology in the Phantom Challenger is so advanced, it can also compete against itself. It has a book opening library of 28,000 positions and U.S.C.F. certified 2100 program.

CHALLENGER

### CHESTER PHANTOM®

(MODEL 6126)

The ultimate in state-of-the-art technology, the Chesster Phantom detects your presence, moves the chess pieces and has over 345 phrases, some of which can be helpful for the player whose ability has yet to reach its full potential. The Chesster Phantom contains a book opening library of 28,000 positions and a U.S.C.F. certified 2100 program.

### CHESTER CHALLENGER®

(MODEL 6120)

This Challenger has a more stylish look as well as a new program that utilizes a 3001 processor that runs at 8 MHZ. Its 33 levels of play will provide a challenge for all levels of chess players. And along with its sensory playing surface, the Chesster Challenger has a 12,000 book opening, take-back feature and a host of other fantastic features.

(photo copyright © by <http://www.schaakcomputers.nl/>) (600 dpi)

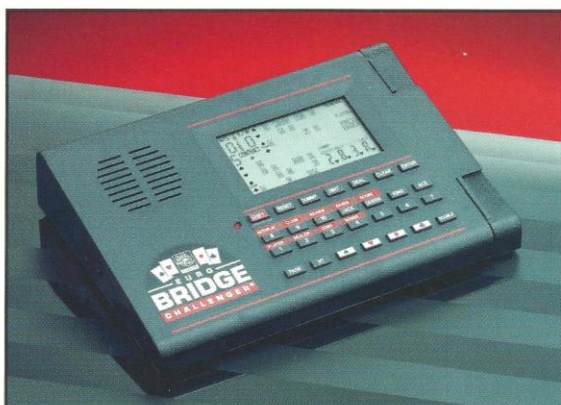

## BRIDGE CHALLENGER®

(MODEL 7017)

Our bridge computer bids and plays one, two, three or all four hands. This intelligent game can deal cards randomly or select from 99,999 preprogrammed deals. It also uses Standard American Bidding System along with popular conventions, including Stayman and Blackwood. The advance technology can even suggest bids and plays for beginners.

7

## EURO BRIDGE CHALLENGER®

(MODEL 7018)

This model contains the European preferred ACOL bidding system as well as the bidding and playing abilities of the Bridge Challenger - practically a universal game targeted for bridge players from Europe and the United States. This unit also features the convenient enlarged LCD window for constant viewing of the dummy hand.

## DELUXE BRIDGE CHALLENGER®

(MODEL 7016)

The deluxe model contains all the sophisticated technology and playing abilities of the Bridge Challenger but with a few added extras. For instance, an enlarged LCD window to constantly view the dummy hand during play and an optical scanner to use custom coded playing cards (included). This is handy if there is more than one human player, and you want to actually deal out the cards.

## THE MASTER SERIES.

This line was created and specially put together by a team of experts for the superior chess player or avid chess enthusiast. Its top of the line technology not only provides the ultimate in challenges but is also assembled using the finest quality and superb craftsmanship.

8

### DESIGNER 2000® (Model 6105)

With an estimated rating of 2,000 USCF rating points, this sleek looking chess set has a book opening library of over 12,000 positions. In addition the Designer 2000 Chess Computer has 24 playing levels for beginner to expert players, an easy to play sensory surface and a LCD display window. The Designer 2,000 will be an added touch to any home.

MASTER

### DESIGNER 2100® (Model 6106)

Similar to the Designer 2000, the powerful Designer 2100 has a certified rating of 2100 by the United States Chess Federation. With a book opening library of over 16,000 positions the Designer 2100 analyzes nearly twice as many chess positions per second as the Designer 2000.

### ELITE PREMIERE® (MODEL 6131)

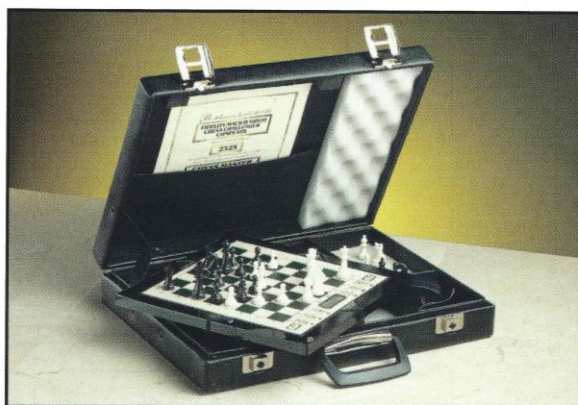

A stunningly beautiful chess computer with an Italian hand inlaid playing surface and carved wooden pieces specially designed to enhance the wooden look of the board. It is truly a state-of-the-art board game, which comes with an autosensory playing surface, 64 LEDs, dual display windows and 33 levels of mind wrenching play. And by using the World Champion Vancouver Program by Richard Lang along with the Master Rated Fidelity 2265 Program, the Elite Premiere offers the "premiere challenge," especially during higher levels of play. This elegant set will sharpen your chess playing skills as well as complement your decor.

8

### MASTER 2265® (Model 6113)

The power is at your command with the Master 2265. Officially rated at 2265 and ranked as a National Chess Master by the United Chess Federation Computer Rating Agency, the Master 2265 uses a 68000 microprocessors running at 16 MHZ and utilizes 64k ROM/80k RAM. Other features include 33 levels to choose from, easy to play sensory playing surface, coaching features, a book opening library of 28,000 positions, take-back feature, fast counter-moves and a problem solving mode.

### MASTER 2325® (MODEL 6129)

You may now own a National Chess Master! Fidelity's 2325 Program is officially rated by the U.S.C.F. and comes with a signed Certificate of Authenticity. With a 68020 Microprocessor running at 20 MHZ, 33 different levels of play for your selection, and a unique Rotating Display Option, which allows you to watch the computer as it thinks about each move, the Master 2325 is the ultimate chess computer. In a black designer housing, with a playing surface in the official tournament colors of buff and green, the Master 2325 comes to you in an imported attache case offering convenient storage and portability.

TRAVELLER

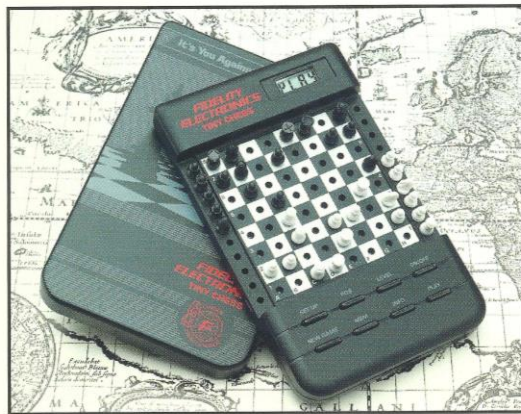

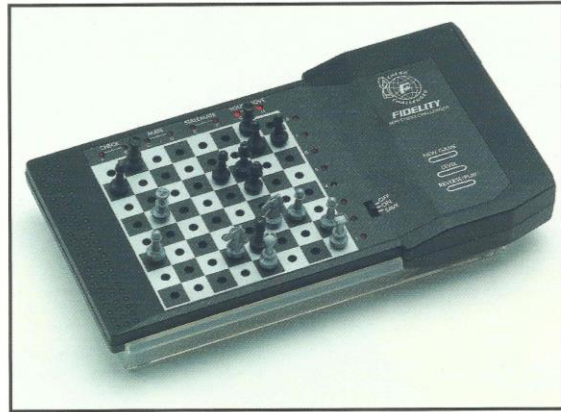

## TRAVELER SERIES.

A line developed for the person who is constantly on the go, yet enjoys the challenges of an electronic board game. Each of these state-of-the-art board games was designed to be easily carried around so that die-hard enthusiasts may never have to miss a day of chess.

### MINI CHESS CHALLENGER®

(Model 6107)

Using a single 9 volt battery for up to 250 hours of play, this convenient sized Mini Chess Computer has a sensory playing board, 16 levels of difficulty, audible indication of moves, position memory save feature and a handy plastic cover. Plus the Mini Chess Computer has a handy storage compartment for stowing chess pieces.

### MICRO CHESS CHALLENGER®

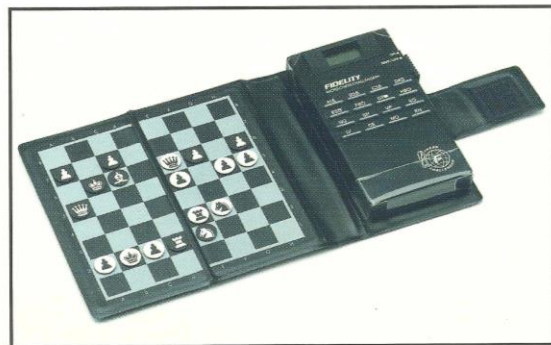

(Model 6096)

This has to be the smallest and most convenient pocket-sized computer chess set available. The Micro Chess Challenger comes with a travel case, built in chess board, magnetic chess pieces, 8 levels of playing difficulty and a memory save feature. 3 AAA batteries will give you up to 500 hours of playing time. The Micro Chess Challenger is great to take anywhere.

### TINY CHESS

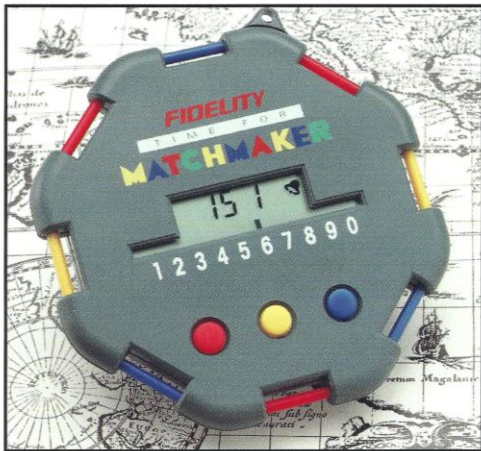

(MODEL 6118)

A small yet powerful chess computer that provides chess players with the luxury of total portability. It features 32 levels of play ranging from beginner to advanced with 4 problem solving levels. It also has a sensory playing surface, which automatically records and displays the computer's and player's moves. The take-back feature allows "accidental" moves to be corrected without any hassles. You can even resume an interrupted game at a later time thanks to its memory-save ability, which stores unfinished games.

(photo copyright © by <http://www.schaakcomputers.nl/>) (600 dpi)

## MATCHMAKER

(MODEL 1851)

It can be an alarm clock or a stopwatch, but that's where all normality ends. The Matchmaker contains six of the most exciting games available anywhere. It'll test your reflexes to the fullest with different degrees of difficulties and provide hours of fun at the same time. This is one match that won't be easy to forget!

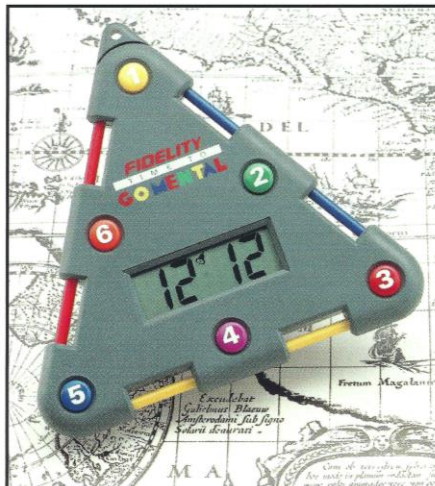

11

## GO MENTAL

(MODEL 1850)

Going "Mental" occasionally can actually be quite enjoyable. This addictive hand-held unit contains 5 games that will guarantee to increase pulse rates a beat or two. It's a test of reflexes and nerves that will make any player come back for more. So, hang on tight and Go Mental! It might be the most sane thing ever experienced. Go Mental also has a built-in clock and alarm.

## HIT KLACK

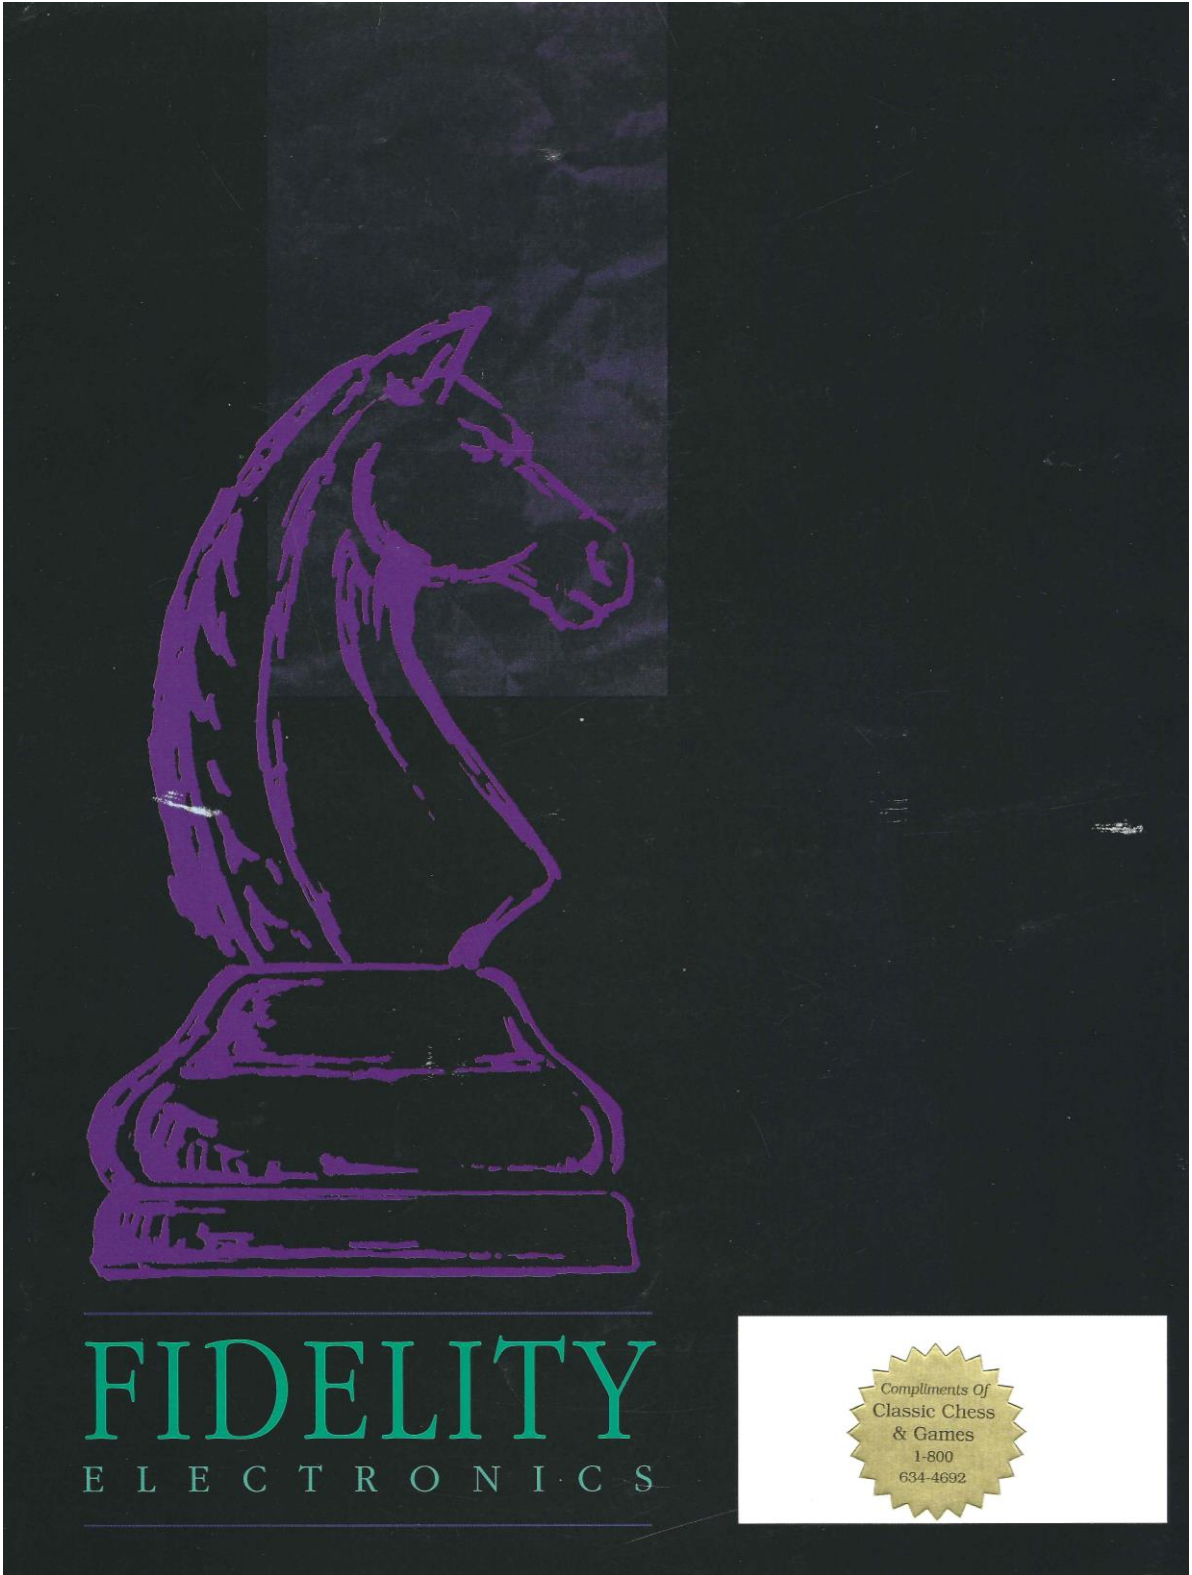

(MODEL 1852)

This unique and highly advanced unit, although small in size, packs features that make it impossible to put down. This three game computer also has an easy-to-read LCD animation display for added excitement. This model also features a clock, alarm and stopwatch.
